

# **City of Troutdale Public Works Department Capital Improvement Plan**

**Adopted March, 2016  
Resolution No. 2331**

**Amended 2017 (SD-N21)  
Amended 2022 (ST-092, ST093, ST-094)**

## **RESOLUTION NO. 2331**

### **A RESOLUTION ADOPTING THE PUBLIC WORKS DEPARTMENT CAPITAL IMPROVEMENT PLAN, RESCINDING RESOLUTIONS 1995 AND 2225, AND RESCINDING THE PARKS CAPITAL IMPROVEMENT PLAN ADOPTED BY RESOLUTION 1941**

#### **THE TROUTDALE CITY COUNCIL FINDS AS FOLLOWS:**

1. ORS 223.309 requires local governments that have system development charges to prepare a capital improvement plan that includes a list of the capital improvements that the local government intends to fund, in whole or in part, with revenues from an improvement fee.
2. The capital improvement plan contained in this resolution is intended to comply with ORS 223.309.
3. Resolution numbers 1941, 2225, and 1995, currently in effect, established the current capital improvement plan project listing.
3. The capital improvement plan contained in this resolution provides a listing of, and information regarding, planned capital improvement projects.
4. This resolution and capital improvement plan does not address projects that are solely for maintenance, repair or replacement and therefore not classified as improvement projects.

#### **NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TROUTDALE**

Section 1. The City of Troutdale Public Works Department Capital Improvement Plan, dated March 2016, attached hereto as Attachment A and made a part hereof, is adopted.

Section 2. Resolution numbers 1995 and 2225 are rescinded.

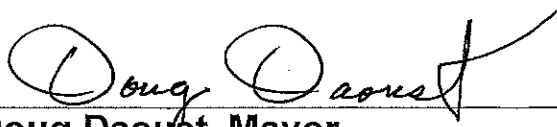

Section 3. The Parks Capital Improvement Plan adopted in Resolution 1941 is rescinded.

Section 4. This Resolution shall be effective immediately upon adoption.

## **RESOLUTION NO. 2381**

### **A RESOLUTION AMENDING THE STORM SEWER CAPITAL IMPROVEMENT PLAN SALMON CREEK WEIR IMPROVEMENT PROJECT COST AND DESCRIPTION, AND AUTHORIZING THE NEGOTIATION OF AN INTERGOVERNMENTAL AGREEMENT WITH THE SANDY DRAINAGE IMPROVEMENT COMPANY**

#### **THE TROUTDALE CITY COUNCIL FINDS AS FOLLOWS:**

1. The Salmon Creek Weir Improvement Project is included in the Capital Improvement Plan adopted by Resolution No. 2331 as Project SD-N21.
2. The Project is to improve the functionality and capacity of drainage and flooding control systems along Salmon Creek and in the Port of Portland's Troutdale Reynolds Industrial Park ("TRIP").
3. The City and the Sandy River Drainage Company (SDIC) have a long established and successful cooperative relationship, providing protection from seasonal flooding of the Columbia and Sandy rivers and from flooding within the SDIC levee system, benefiting the City.
4. The City and SDIC entered into an intergovernmental agreement (IGA) via Resolution No. 1919 providing a partnership for the purpose of permitting, designing, constructing, operating, and maintaining the Salmon Creek Weir Improvement Project.
5. The circumstances have changed since the 2008 IGA with significant additional development in TRIP expanding the scope and complexity of stormwater management required to support the development.
6. The increased stormwater management burden of the TRIP development requires increased capacity and increased functionality that has increased the Project cost, scale and complexity..
7. The SDIC has requested, and the City Council has conditionally agreed to provide, an additional \$260,000 in City funding contribution for the revised Project.
8. An amendment to the Capital Improvement Plan and a revised IGA are necessary for the City to provide the additional funding contribution to the Project.

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TROUTDALE:**

Section 1. The Capital Improvement Plan is hereby amended to increase the City's share of the Salmon Creek Weir Improvement Project (SD-N21) cost to a total of \$410,000.

Section 2. This amendment to the Capital Improvement Plan is in compliance with ORS 223.309(2) updating the list of the capital improvements which the City intends to fund, in whole or in part, with revenues from system development charges.

Section 3. Directs and authorizes a City Official to negotiate an IGA with SDIC to assign responsibilities for the acquisition of real property interest, permits, and other permission that may be necessary for the Project, for the design and construction of the Project, and for the ongoing operation and maintenance of the Project.

Section 4. The Public Works Director, Finance Director, or City Manager, (each a "City Official") or a designee of the City Official, is hereby authorized, empowered and directed to negotiate on behalf of the City a tentative IGA to be submitted for Council approval.

Section 5. Consistent with intent of the resolution, and in the best interest of the City, the City Official is hereby authorized to execute any and all required and necessary documents to implement the intent of the resolution.

Section 6. This Resolution shall be effective upon adoption.

## **RESOLUTION NO. 2561**

### **A RESOLUTION AMENDING THE CAPITAL IMPROVEMENT PLAN ADOPTED IN RESOLUTION 2331.**

#### **THE TROUTDALE CITY COUNCIL FINDS AS FOLLOWS:**

1. ORS 223.309 requires local governments that have system development charges to prepare a capital improvement plan that includes a list of the capital improvements that the local government intends to fund, in whole or in part, with revenues from an improvement fee.
2. The capital improvement plan and proposed amendments contained in this resolution are intended to comply with ORS 223.309.
3. Resolution 2331 established the current capital improvement plan project listing.
4. The amendments contained in this resolution provides a listing of, and information regarding, planned capital improvement projects that have been identified through adopted long-range planning efforts of the City of Troutdale and the Urban Renewal Agency of the City of Troutdale that occurred after the adoption of Resolution 2331.
5. This resolution and capital improvement plan does not address projects that are solely for maintenance, repair, or replacement and therefore not classified as improvement projects.

#### **NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TROUTDALE**

Section 1. The Transportation Improvements section of the City of Troutdale Capital Improvement Plan, dated March 2016, is hereby amended to include those amendments as attached hereto as Attachment A and made a part hereof.

Section 2. This Resolution shall be effective immediately upon adoption.

# Introduction

This document provides a plan for City-funded, capacity-enhancing capital improvements that the City anticipates will be needed over approximately the next 20 years. Among other purposes, this plan supports the expenditure of system development charge improvement fees as required by ORS 223.309.

The City's Comprehensive Plan provides the overall context for development and redevelopment patterns within the City. Comprehensive planning leads to projections of the magnitude of growth and the patterns and intensities of growth and development. These projections in turn inform the development of system Master Plans. System Master Plans are the primary source for projects in this CIP. Projects can also be identified based on the goals and vision of the community and the City Council.

The Plan is the result of a process involving four distinct steps:

1. Project identification by the appropriate Public Works Division. Projects are most commonly identified through the City's Master Plans and each Master Plan has included public involvement during its development. Projects can be identified through other processes as well, often after receiving input from concerned citizens, groups, or organizations.
2. Project reviews and consolidation by the Public Works Department.
3. Project review and comment by other City staff.
4. Plan revision, if necessary, and adoption by the City Council following a public hearing.

The Plan consists of these elements:

1. Project Name: A brief description of the project.
2. Project Number: A five-digit number consisting of a two-digit prefix identifying the type of project (WA = Water, SA = Sanitary Sewer, SD = Storm Drainage, ST = Streets/Transportation, and PA = Parks) and three digits to consecutively number the projects within their respective categories from 001 to 999. Storm drainage projects vary slightly, with the third digit being either an "N" (for North Troutdale Drainage Basin, flowing to the Columbia River) or an "S" (for South Troutdale Drainage Basin, flowing to the Sandy River), then the last two digits number the projects consecutively from 01 to 99 within the basin. The project numbers are for tracking and reporting purposes only and do not denote priority or proposed sequence of accomplishment.
3. Timeframe: The estimated general timeframe within which the project is expected to occur. Immediate: Project is in progress, or to commence within the next 1 or 2 fiscal years. Short: Within the next 5 fiscal years. Medium: Within the next 5-10 fiscal years. Long: 10 years or more.

4. Estimated Cost: The estimated cost of the project. Where applicable, the total cost of the project along with the anticipated City contribution. All costs shown in this plan are reflected in current dollars (as if the project were built today), excepting the Parks CIP which is in 2008 dollars, and actual dollar figures realized for future projects will likely be higher due to construction cost inflation over time.
5. Funding Source: The proposed source of funds for the project, including the percentage of the project cost that will be paid for with system development charge revenue. "Improvement Funds" contain SDC revenue. Identification of a proposed funding source does not prohibit the City Council and Budget Committee from substituting an alternative funding source due to funding availability or other reasons, subject to the limitations and requirements of budget and SDC laws and ordinances.
6. Problem: The problem to be solved by the project.
7. Proposed Solution/Description: A description of the essential elements of the project.
8. Identified By: The agency, document or other party that identified the problem and/or proposed the solution.
9. In Previous CIP: Yes = This project was listed in the previous iteration of the adopted CIP; No = This is a newly identified project in this current iteration of the CIP.
10. Related Projects: The identification of any other Capital Improvement Projects that might substantially affect this project.

This Plan does not appropriate funds nor authorize improvements to be accomplished. Funding for a proposed project must be appropriated through the normal budget process. The City Council and Budget Committee retain authority to approve or reject funding for any project herein during that budget process each fiscal year. Applicable Federal, State, and local laws, rules, and regulations apply. Inclusion of a project in this Plan is not an indication that project approval will be granted, funds will be appropriated, external funds will be forthcoming, or necessary permits will be issued. The City Council may amend this plan at any time, and it is recommended that this plan be reviewed and updated (as needed) by the City Council at least annually.

Comments concerning the format and/or content of this Plan are welcomed and should be addressed to the Public Works Department, City of Troutdale, 342 SW 4th Street, Troutdale, OR 97060.

### **ABBREVIATIONS**

CBD	Central Business District

STIP	Surface Transportation Improvement Program (State of Oregon)
URA	Urban Renewal Area or Urban Renewal Agency

# Transportation Improvements

- 1. Project Name:** Improve NW Graham Road
- Project Number:** ST-080
- Timeframe:** Immediate (in-progress)
- Estimated Cost:** \$ 3,400,000 (Total Cost) \$ 550,000 (City Share)
- Funding Source:** Port of Portland, ODOT (\$ 2,850,000)  
Street Improvement Fund (\$ 550,000)
- Problem:** Portions of NW Graham Road need to be reconstructed, widened and/or structurally upgraded to accommodate traffic growth, especially freight, with the development of the north industrial area including the Troutdale Reynolds Industrial Park.
- Proposed Solution:** Widen and improve selected portions of NW Graham Road.
- Identified By:** *City of Troutdale Transportation System Plan, 2014* (Project M8)
- In Previous CIP?** Yes
- Related Project(s):** SD-N20

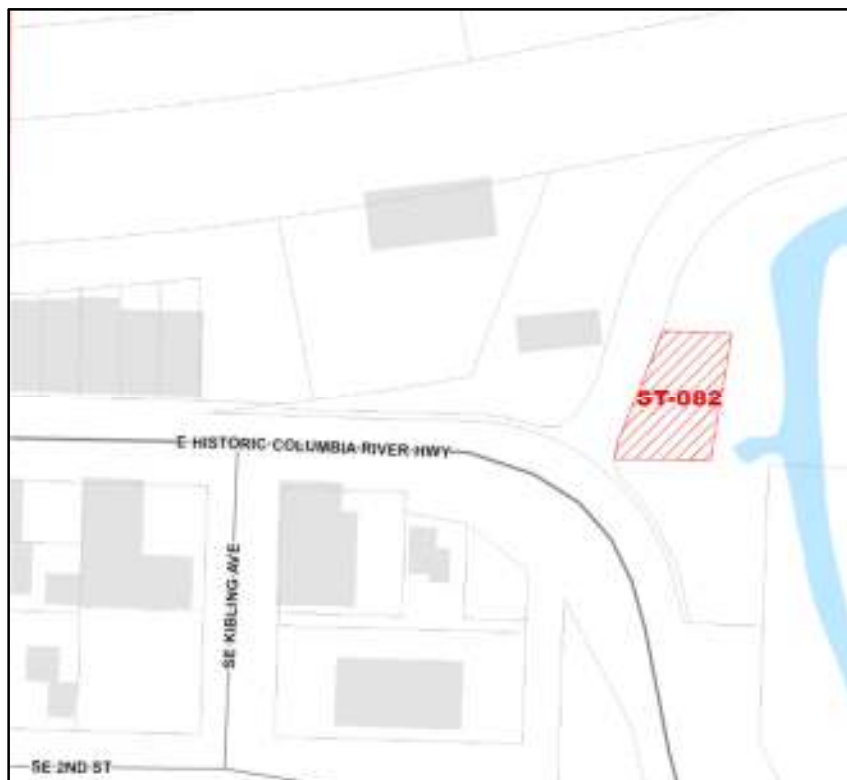

- 2. Project Name:** Downtown Parking Lot
- Project Number:** ST-089
- Timeframe:** Immediate
- Estimated Cost:** \$ 50,000
- Funding Source:** Police Facility Capital Project Fund (100%)
- Problem:** Additional parking capacity is desired in the central business district and business owners have indicated a desire for more public parking availability in the CBD for all users. The construction of the new Police Facility has left the old Police Department site available for redevelopment and reuse.
- Proposed Solution:** Construct a public parking lot on the old Police Department site at 141 SE Dora Avenue.
- Identified By:** City Council
- In Previous CIP?** No
- Related Project(s):** ST-081

- 3. Project Name:** Downtown Parking Study
- Project Number:** ST-090
- Timeframe:** Immediate
- Estimated Cost:** \$ 51,000
- Funding Source:** Street Fund (25%), Street Improvement (25%)  
General Fund-Planning (50%)
- Problem:** Additional ADA and bicycle parking is desired in the central business district and business owners have indicated a desire for more public parking availability in the CBD for all users.
- Proposed Solution:** Conduct a study to optimize existing parking in the CBD, and to identify and assess opportunities for developing additional public parking, including ADA and bicycle parking.
- Identified By:** *City of Troutdale Transportation System Plan, 2014* (Project M13)
- In Previous CIP?** No
- Related Project(s):** ST-081, ST-082, ST-089

4. **Project Name:** Columbia Gorge Bike Hub
- Project Number:** ST-082
- Timeframe:** Immediate
- Estimated Cost:** \$85,000
- Funding Source:** ODOT (100%)
- Problem:** The CBD is a town center intended to be bicycle-friendly. Additionally, the CBD lies on a very popular bicycle touring route and experiences large, and increasing, bicycle traffic volumes. Bicycle parking and support facilities for cyclists are very limited in the CBD, discouraging CBD workers from bicycling and discouraging bicyclists from visiting and stopping in the CBD. Travel Oregon is partnering with Cities (including Troutdale) along the Columbia Gorge and other community groups to develop Bicycle Hubs in each City that will provide rest stops and support services for bicycle riders. Troutdale currently lacks such a bike hub.
- Proposed Solution:** Construct a Bike Hub along Historic Columbia River Highway
- Identified By:** Travel Oregon, Chamber of Commerce, City Council
- In Previous CIP?** No
- Related Project(s):** ST-090, ST-081

- 5. Project Name:** ADA Transition Plan for PW Facilities
- Project Number:** ST-083
- Timeframe:** Immediate
- Estimated Cost:** \$ 15,000
- Funding Source:** Public Works Management (100%)
- Problem:** All municipalities are required to prepare, adopt and pursue an ADA transition plan to remove existing ADA barriers. The City's ADA transition plan is out of date and needs updated.
- Proposed Solution:** Prepare a new ADA transition plan for Public Works Facilities.
- Identified By:** Staff
- In Previous CIP?** No
- Related Project(s):** ST-088

- 6. Project Name:** Primary Access to Urban Renewal Area
- Project Number:** ST-084
- Timeframe:** Short Term
- Estimated Cost:** \$3,197,000
- Funding Source:** Urban Renewal Agency (100%)
- Problem:** The Urban Renewal Area lacks a sufficient primary automobile, bicycle and pedestrian access road.
- Proposed Solution:** Acquire right-of-way and construct a new public street through the Columbia Factory Outlet Mall property from the intersection of SW 257<sup>th</sup> Avenue and SW 257<sup>th</sup> Way to the Urban Renewal Area.
- Identified By:** *Riverfront Renewal Plan, 2006 (AMDD 2014)*
- In Previous CIP?** No
- Related Project(s):** None

- 7. Project Name:** Bicycle Parking in the CBD
- Project Number:** ST-081
- Timeframe:** Short Term
- Estimated Cost:** \$ 31,000
- Funding Source:** Bike Paths and Trails Fund (50%), Street Fund (50%)
- Problem:** The CBD is a town center intended to be bicycle-friendly. Additionally, the CBD lies on a very popular bicycle touring route and experiences large, and increasing, bicycle traffic volumes. Bicycle parking is currently very limited in the CBD, discouraging CBD workers from bicycling and discouraging bicyclists from visiting and stopping in the CBD.
- Proposed Solution:** Install bicycle parking in the CBD at one or more locations, including covered/long-term bicycle parking
- Identified By:** *City of Troutdale Transportation System Plan, 2014* (Project B18)
- In Previous CIP?** No
- Related Project(s):** ST-082, ST-090, ST-091

<b>8. Project Name:</b>	Shared Roadway Pavement Markings
<b>Project Number:</b>	ST-091
<b>Timeframe:</b>	Short Term
<b>Estimated Cost:</b>	\$ 62,000
<b>Funding Source:</b>	Street Fund (100%)
<b>Problem:</b>	Several bicycle routes in the City do not have sufficient roadway space for dedicated bicycle lanes and are low-speed roads where bicycles can safely share the travel lanes with vehicles.
<b>Proposed Solution:</b>	Install shared roadway pavement markings.
<b>Identified By:</b>	<i>City of Troutdale Transportation System Plan, 2014</i> (Projects B11-B15)
<b>In Previous CIP?</b>	No
<b>Related Project(s):</b>	None

- 9. Project Name:** Pedestrian Crossings/Traffic Calming in the CBD
- Project Number:** ST-079
- Timeframe:** Short Term
- Estimated Cost:** \$ 150,000 (Total Cost) \$ 60,000 (City Share)
- Funding Source:** County (50%), Developer (10%), Street Fund (25%)  
Street Improvement Fund (15%)
- Problem:** The CBD is a Town Center intended to be pedestrian-oriented, with additional focus on pedestrian safety, accessibility and circulation. Current configuration of Historic Columbia River Highway is auto-oriented and needs to be friendlier and more inviting to pedestrians, encourage pedestrians to circulate between north and south sides of street, and ADA compliant. On-street parking limits sight distance for vehicles entering from side-streets. Traffic calming is needed to reduce vehicle speeds and improve vehicular and pedestrian safety.
- Proposed Solution:** Install curb extensions, including new ADA ramps, along HCRH at Kendall, Buxton, Dora, Harlow and Kibling intersections on north and south sides of HCRH
- Identified By:** *City of Troutdale Transportation System Plan, 2014 (Project P37)*
- In Previous CIP?** No
- Related Project(s):** None

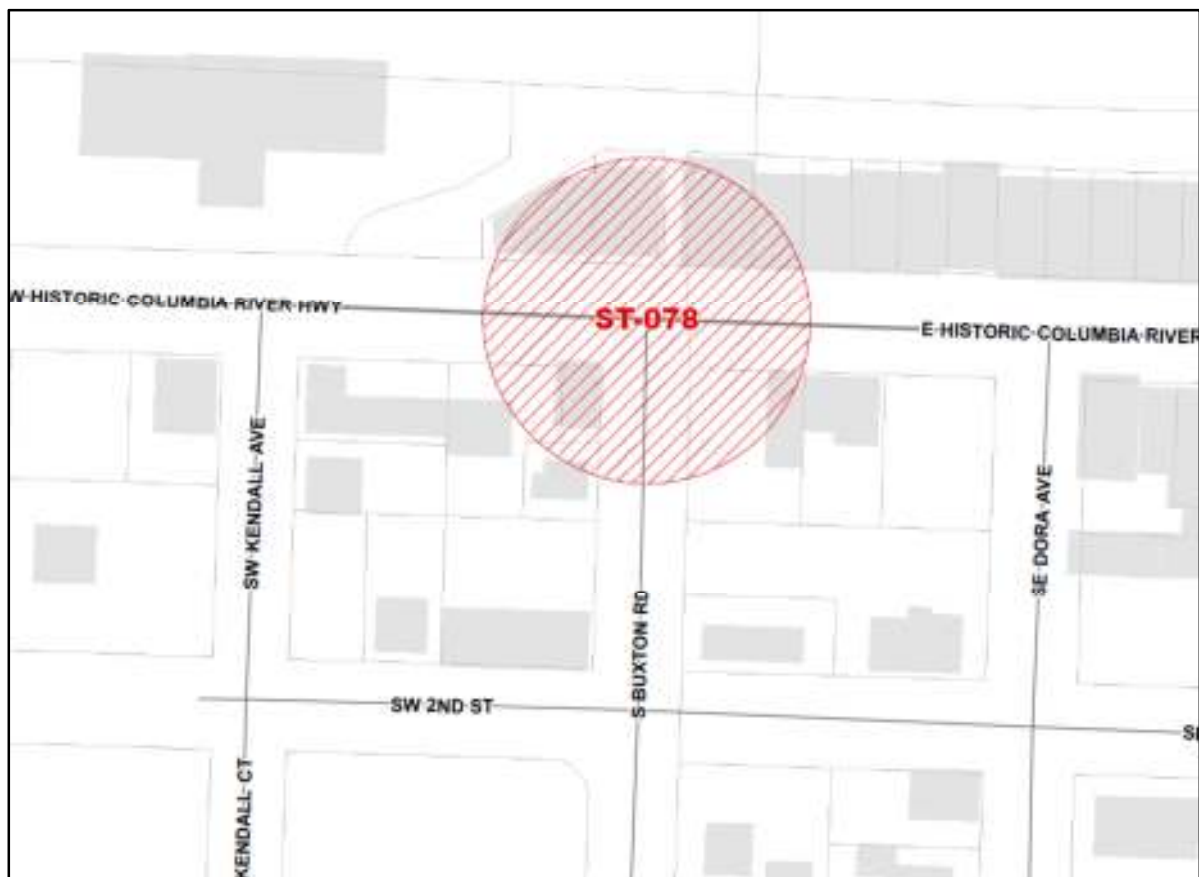

<b>10. Project Name:</b>	Improve Stark Street from 257th to Troutdale Road
<b>Project Number:</b>	ST-007
<b>Timeframe:</b>	Short Term
<b>Estimated Cost:</b>	\$ 3,690,000 (Total Cost)    \$ 369,000 (City Share)
<b>Funding Source:</b>	County/Regional Funds (90%), Street Improvement Fund (10%)
<b>Problem:</b>	This portion of Stark Street needs additional travel lanes, a center turn lane, and bike and pedestrian capacity.
<b>Proposed Solution:</b>	Widen this portion of Stark Street to provide four travel lanes and a turn lane, reduce vertical and horizontal curves, and construct sidewalks and bike lanes.
<b>Identified By:</b>	<i>City of Troutdale Transportation System Plan, 2014</i> (Project M4), STIP, RTP
<b>In Previous CIP?</b>	Yes
<b>Related Project(s):</b>	SD-S27

<b>11. Project Name:</b>	Construct Pedestrian Access ways
<b>Project Number:</b>	ST-064
<b>Timeframe:</b>	Short, Med and Long Term
<b>Estimated Cost:</b>	\$ 120,000
<b>Funding Source:</b>	Bike Paths and Trails Fund (100%)
<b>Problem:</b>	Lack of pedestrian connectivity in several areas of the City.
<b>Proposed Solution:</b>	Construct pedestrian connection access ways in various locations in the City.
<b>Identified By:</b>	Staff
<b>In Previous CIP?</b>	Yes
<b>Related Project(s):</b>	None

<b>12. Project Name:</b>	Improve SW Hensley Road – N/S leg
<b>Project Number:</b>	ST-012
<b>Timeframe:</b>	Medium Term
<b>Estimated Cost:</b>	\$ 300,000
<b>Funding Source:</b>	Street Improvement Fund (50%), Street Fund (50%)
<b>Problem:</b>	The north/south leg of SW Hensley does not meet current City street standards due to a lack of curbs, sidewalks and other standard streetscape elements.
<b>Proposed Solution:</b>	Improve SW Hensley Road by widening the roadway and constructing curbs, sidewalks, pedestrian crossings and other streetscape elements to meet current standards.
<b>Identified By:</b>	<i>City of Troutdale Transportation System Plan, 2014 (Project P8)</i>
<b>In Previous CIP?</b>	Yes
<b>Related Project(s):</b>	SD-S34

<b>13. Project Name:</b>	Signal at Buxton/Historic Columbia River Highway
<b>Project Number:</b>	ST-078
<b>Timeframe:</b>	Medium Term
<b>Estimated Cost:</b>	\$ 250,000 (Total Cost) \$ 50,000 (City Share)
<b>Funding Source:</b>	County/Regional Funds (80%), Street Improvement Fund (20%)
<b>Problem:</b>	This intersection is currently stop controlled and experiences heavy volumes during peak hours. Proximity to 257/HCRH intersection creates traffic issues and backups. There is limited opportunity for traffic making a left turn from Buxton onto the Historic Columbia River Highway, resulting in delay and backups on Buxton.
<b>Proposed Solution:</b>	Install a traffic signal at the intersection of Buxton Avenue and the Historic Columbia River Highway. Coordinate signal phasing with 257 <sup>th</sup> /Columbia River Highway signal.
<b>Identified By:</b>	<i>City of Troutdale Transportation System Plan, 2014</i> (Project M11)
<b>In Previous CIP?</b>	Yes
<b>Related Project(s):</b>	None

**14. Project Name:** Reconstruct and Improve NW Dunbar Avenue

**Project Number:** ST-045

**Timeframe:** Medium Term

**Estimated Cost:** \$ 468,000

**Funding Source:** Street Improvement Fund (50%), Street Fund (50%)

**Problem:** NW Dunbar Avenue does not meet current City street standards due to insufficient pavement width, curbs, sidewalks and other standard streetscape elements..

**Proposed Solution:** Improve NW Dunbar Avenue by widening the roadway and constructing curbs, sidewalks, pedestrian crossings and other streetscape elements to meet the commercial/industrial standard.

**Identified By:** *City of Troutdale Transportation System Plan, 2014* (Project M14)

**In Previous CIP?** Yes

**Related Project(s):** SD-N16

**15. Project Name:** Pedestrian Bridge from CBD to URA  
**Project Number:** ST-085  
**Timeframe:** Long Term  
**Estimated Cost:** \$ 3,074,000  
**Funding Source:** Urban Renewal Agency (100%)  
**Problem:** There is a lack of direct pedestrian connectivity between the URA and the CBD. The Union Pacific Railroad (UPRR) presents a barrier to developing traditional ground-level pedestrian connections between the CBD and the URA.  
**Proposed Solution:** Construct a pedestrian bridge over the UPRR right of way between the CBD and the URA.  
**Identified By:** *Riverfront Renewal Plan, 2006 (AMDD 2014)*  
**In Previous CIP?** No  
**Related Project(s):** None

<b>16. Project Name:</b>	Backage Road (Marine Drive Extension)
<b>Project Number:</b>	ST-077
<b>Timeframe:</b>	Long Term
<b>Estimated Cost:</b>	\$ 9,737,000 (Total Cost) \$ 1,168,000 (City Share)
<b>Funding Source:</b>	ODOT STIP (88%), Street Improvement (12%)
<b>Problem:</b>	There are congestion and turning movement conflicts on the southern Frontage Road.
<b>Proposed Solution:</b>	Construct a roadway from the intersection of Marine Drive/South Frontage Road southerly and easterly to the intersection of 257th Drive/257th Way behind the Frontage Road businesses.
<b>Identified By:</b>	<i>City of Troutdale Transportation System Plan, 2014 (Project M9), Troutdale Interchange Area Management Plan, 2011</i>
<b>In Previous CIP?</b>	Yes
<b>Related Project(s):</b>	None

**17. Project Name:** Update the Transportation System Plan

**Project Number:** ST-086

**Timeframe:** Long Term

**Estimated Cost:** \$100,000

**Funding Source:** General Fund-Planning (50%), Street Improvement (50%)

**Problem:** The current Transportation System Plan, prepared in 2014, will be in need of update. The need to update may also be driven by Periodic Review or other state Planning requirements.

**Proposed Solution:** Prepare an updated Transportation System Plan.

**Identified By:** Staff

**In Previous CIP?** No

**Related Project(s):** None

**18. Project Name:** Sidewalk Infill

**Project Number:** ST-087

**Timeframe:** Ongoing

**Estimated Cost:** \$75,000

**Funding Source:** Bike Paths and Trails Fund (50%), Street Fund (50%)

**Problem:** There are numerous gaps in the City's sidewalk system and some streets lack sidewalks entirely.

**Proposed Solution:** Construct sidewalks to infill gaps and to provide sidewalks on streets that have none.

**Identified By:** Staff

**In Previous CIP?** No

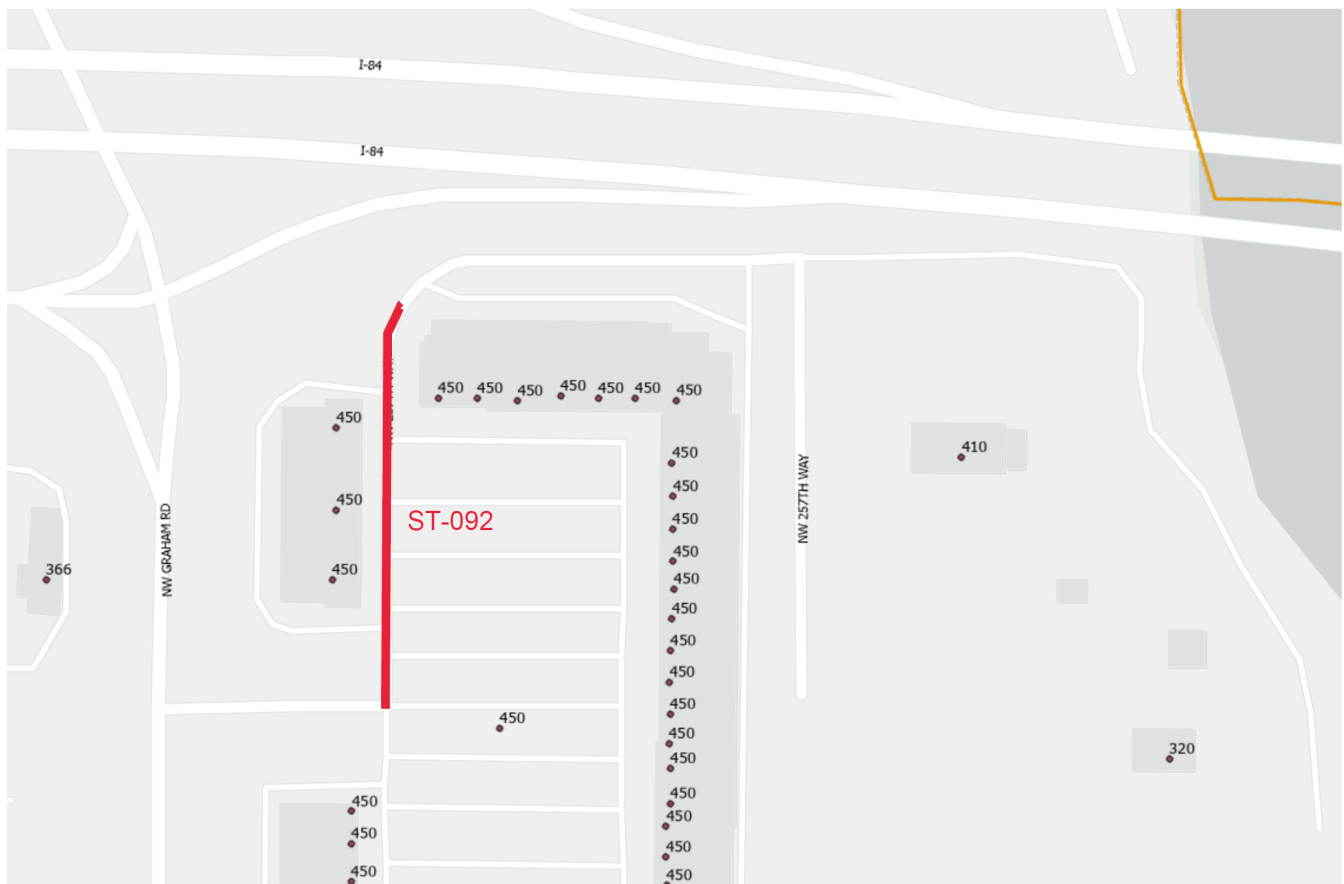

**Related Project(s):** None

**19. Project Name:** ADA Infill/Upgrades on Public Streets  
**Project Number:** ST-088  
**Timeframe:** Ongoing  
**Estimated Cost:** \$250,000  
**Funding Source:** Street Fund (50%), Bike Paths and Trails Fund (50%)  
**Problem:** The ADA Transition Plan will identify needed ADA infill and upgrade projects.  
**Proposed Solution:** Construct new and upgraded ADA facilities on public streets where directed by the ADA Transition Plan.  
**Identified By:** Staff  
**In Previous CIP?** No  
**Related Project(s):** ST-083

<b>Project Name:</b>	Improve NW 257 <sup>th</sup> Way
<b>Project Number:</b>	ST-092
<b>Timeframe:</b>	Short-Term
<b>Estimated Cost:</b>	\$ 1,800,000
<b>Funding Source:</b>	Urban Renewal Agency or associated Development Agreement (100%)
<b>Problem:</b>	The existing roadway that connects from 257 <sup>th</sup> Drive to The Confluence site in the Urban Renewal Area does not satisfy expectations for a primary entrance road to a significant development site, nor meets current right-of-way standards, particularly in the alignment that cuts through the Columbia Gorge Outlets.
<b>Proposed Solution:</b>	Reconstruct the roadway, particularly along the north-south alignment in the northwest section of the Columbia Gorge Outlets by removing several outlet mall parking drive aisle connections, reconfiguring existing on-street parking, and providing for enhanced pedestrian facilities and streetscape treatments.
<b>Identified By:</b>	<i>2020-2040 Town Center Plan; The Confluence Framework Plan (2022)</i>
<b>In Previous CIP?</b>	No
<b>Related Project(s):</b>	ST-084

<b>Project Name:</b>	Second Street Bridge
<b>Project Number:</b>	ST-093
<b>Timeframe:</b>	Short-Term
<b>Estimated Cost:</b>	\$ 2,800,000
<b>Funding Source:</b>	Adjacent Property Development (60%), Metro Parks/Nature Bond (25%), City Share (15%)
<b>Problem:</b>	Bicycle and pedestrian crossings of 257 <sup>th</sup> Drive, particularly at Historic Columbia River Highway are unsafe and present an obstacle to mobility and better connections between downtown and the Halsey neighborhood in the Town Center district, which as of 2022 is the fastest-growing area of the city with nearly 250 dwelling units to be added by 2025.
<b>Proposed Solution:</b>	Acquire a +/- 0.75 acre site on the west side of 257 <sup>th</sup> Drive to enable for a western access and approach for the trail. Require of any future development the conveyance of a right-of-way or granting of an easement to connect the 2 <sup>nd</sup> Street right-of-way to the 257 <sup>th</sup> Drive right-of-way. Construct a 14-foot wide bicycle and pedestrian bridge that spans over 257 <sup>th</sup> Drive, connecting with 2 <sup>nd</sup> Street to the east and access to Halsey Street on the west, with connections to adjacent properties where appropriate. Establish a public parking facility on remaining property that is not required to construct the bridge.
<b>Identified By:</b>	2020-2040 Town Center Plan
<b>In Previous CIP?</b>	No
<b>Related Project(s):</b>	None

<b>Project Name:</b>	Central Parking Facility
<b>Project Number:</b>	ST-094
<b>Timeframe:</b>	Short-Term
<b>Estimated Cost:</b>	\$ 12,000,000
<b>Funding Source:</b>	Urban Renewal Agency or associated Development Agreement (20%) State of Oregon (80%)
<b>Problem:</b>	Future opportunity site development in the Town Center—including prospective development of The Confluence site as envisioned by the 2020-2040 Town Center Plan and Framework Plan—will place strains on existing on-street and off-street parking facilities beyond what parking demand management can solve. In addition, congestion issues in the Columbia River Gorge have led to restrictions on public accessibility and mobility challenges for visitors to popular tourist amenities and activities.
<b>Proposed Solution:</b>	Construct a 350 vehicle parking stall parking garage on 1.5 acres of land in the Urban Renewal Area that accommodates for short-term and longer-term (up to 96 hours) public parking and a certain percentage of reserved parking stalls for residents of future residential or mixed-use development of The Confluence site. Locate the facility near the Downtown to potentially allow for a direct connection via the proposed CBD-URA bridge (project ST-085). Incorporate a “transit hub” to allow for future bus, shuttle, and rail service for transit operators. Ensure the facility has adaptive reuse potential to convert into other uses if parking structures become obsolete due to advanced autonomous vehicle technology.
<b>Identified By:</b>	<i>Riverfront Renewal Plan (2006); 2020-2040 Town Center Plan; The Confluence Framework Plan (2022)</i>
<b>In Previous CIP?</b>	No
<b>Related Project(s):</b>	ST-085

# Water Improvements

- 1. Project Name:** Reservoir Seismic Study
- Project Number:** WA-044
- Timeframe:** Short Term
- Estimated Cost:** \$ 86,000
- Funding Source:** Water Fund (100%)
- Problem:** The City's drinking water reservoirs were built prior to the implementation of current seismic standards and appear to be deficient with respect to modern seismic protections. Reservoirs are critical infrastructure to protect life and health during a disaster event. Additionally, reservoir failure in an earthquake could result in significant property damage. Reservoirs should be constructed and equipped to survive the Maximum Credible Earthquake (MCE) event to the maximum extent practicable based on current knowledge and standards.
- Proposed Solution:** Conduct a study to determine the seismic performance of all four of the City's reservoirs under the MCE event scenario and to make specific retrofit recommendations for each reservoir to improve its ability to survive the MCE event without failure or loss of contents. This will inform and determine the specific scopes of work for WA-045 and WA-046.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** WA-045, WA-046

- 2. Project Name:** Reservoir No. 2 Seismic Improvements
- Project Number:** WA-045
- Timeframe:** Short Term
- Estimated Cost:** \$ 339,000
- Funding Source:** Water Fund (100%)
- Problem:** Reservoir 2 was built prior to the implementation of current seismic standards and appears to be deficient with respect to modern seismic protections. Reservoirs are critical infrastructure to protect life and health during a disaster event. Additionally, reservoir failure in an earthquake could result in significant property damage. Reservoir 2 is the City's most important reservoir, and also the reservoir with the highest potential property damage consequence in a structural failure. Reservoir 2 should be constructed and equipped to survive the Maximum Credible Earthquake (MCE) event to the maximum extent practicable based on current knowledge and standards.
- Proposed Solution:** Retrofit seismic upgrades to the reservoir in accordance with the recommendation of a reservoir seismic study.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** WA-044

- 3. Project Name:** Extend Water Line from Spectro (Commerce Court) to Galli Container Storage Property (formerly RMAC)
- Project Number:** WA-028
- Timeframe:** Short Term
- Estimated Cost:** \$ 80,000
- Funding Source:** Water Improvement Fund (100%)
- Problem:** The water distribution system is not looped in this area.
- Proposed Solution:** Construct a water line to loop the system. Looping the distribution system in this area increases capacity and reliability by allowing flow from either direction, and improves water quality by eliminating dead ends in the system where water can become stale and accumulate sediments. This increased capacity and reliability is needed to serve growth in the north industrial area.
- Identified By:** *City of Troutdale Water Master Plan, 2012, Staff\**
- In previous CIP?** Yes\*
- Related Project(s):** WA-040

\*This is a staff-developed variation on the project identified in the Master Plan and prior CIP

- 4. Project Name:** Rogers Circle to Spectro (Commerce Court) Water Main Loop
- Project Number:** WA-040
- Timeframe:** Short Term
- Estimated Cost:** \$ 97,000
- Funding Source:** Water Improvement Fund (50%), Water Fund (50%)
- Problem:** The water distribution system is not looped in this area.
- Proposed Solution:** Construct a water line to loop the system. Looping the distribution system in this area increases capacity and reliability by allowing flow from either direction, and improves water quality by eliminating dead ends in the system where water can become stale and accumulate sediments. This increased capacity and reliability is needed to serve growth in the north industrial area.
- Identified By:** *City of Troutdale Water Master Plan, 2012/Staff\**
- In previous CIP?** Yes\*
- Related Project(s):** WA-028

\*This is a staff-developed variation on the project identified in the Master Plan and prior CIP

- 5. Project Name:** Urban Renewal Area to Harlow Place Loop
- Project Number:** WA-042
- Timeframe:** Short Term
- Estimated Cost:** \$ 155,000 (Total Cost) \$ 15,500 (City Share)
- Funding Source:** Developer (90%), URA (10%)
- Problem:** The water distribution system is not looped in this area.
- Proposed Solution:** Construct two water line segments to loop the system. Looping the distribution system in this area increases capacity and reliability by allowing flow from either direction, and improves water quality by eliminating dead ends in the system where water can become stale and accumulate sediments. This improvement is needed to serve growth in the URA and along Harlow Place. Additionally, this loop will increase capacity and reliability of fire flows to serve growth in the north industrial area. Include a PRV at the pressure zone boundary.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** None

- 6. Project Name:** 7<sup>th</sup> Street – Kings Byway Water Main Upsizing
- Project Number:** WA-048
- Timeframe:** Short Term
- Estimated Cost:** \$ 425,000
- Funding Source:** Water Fund (100%)
- Problem:** Modeled fire flows along Kings Byway are below current firefighting standards. Residents along these streets experience low pressures when the altitude valve at Reservoir #1 opens, due to the higher velocities developed in the existing small main.
- Proposed Solution:** Upsize the water main in 7<sup>th</sup> Street and Kings Byway from 6” to 8” diameter.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** None

- 7. Project Name:** Upgrade Booster Pump Station No. 2
- Project Number:** WA-047
- Timeframe:** Short Term
- Estimated Cost:** \$ 50,000
- Funding Source:** Water Fund (100%)
- Problem:** Booster pump station No. 2 boosts pressure and flow to the southernmost service area of the City (Zone 6). The current booster station is under capacity and, as a result, the service area experiences periods of low pressure and fire flows could be impaired.
- Proposed Solution:** Upgrade the booster pumping station to increase capacity, providing more reliable service pressures and fire flows.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** None

- 8. Project Name:** SW Cherry Park Road to SW Spence Rd Loop
- Project Number:** WA-049
- Timeframe:** Medium Term
- Estimated Cost:** \$ 65,000
- Funding Source:** Developers (100%)
- Problem:** The water distribution system is not looped in this area. Modeled fire flows along Spence Rd are inadequate.
- Proposed Solution:** Construct a water line to loop the system. Looping the distribution system in this area increases capacity and reliability by allowing flow from either direction, and improves water quality by eliminating dead ends in the system where water can become stale and accumulate sediments. This loop will additionally benefit infill subdivision development of the adjacent properties on Cherry Park Road by providing a water main to serve those properties.
- Identified By:** Staff
- In previous CIP?** No
- Related Project(s):** None

- 9. Project Name:** Construct a 1.0 MG Standpipe (Reservoir No. 5) with line to Zone 1
- Project Number:** WA-008
- Timeframe:** Medium Term
- Estimated Cost:** \$ 2,257,000
- Funding Source:** Water Improvement Fund (100%)
- Problem:** There is inadequate storage for Zones 1, 2, & 3. Zone 6 currently requires booster pumping to maintain adequate service pressures and flows.
- Proposed Solution:** Construct a 1.0 MG Standpipe to provide additional capacity for fire flow and periods that wells are inoperative or unable to meet demand, with a transmission line connecting to pressure Zone 1 at Stark Street. Interconnect current Zone 6 to incorporate Zone 6 into Zone 1.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** None

**10. Project Name:** Rogers Circle to Graham Circle Water Main Loop

**Project Number:** WA-041

**Timeframe:** Medium Term

**Estimated Cost:** \$ 65,000

**Funding Source:** Water Fund (100%)

**Problem:** The water distribution system is not looped in this area.

**Proposed Solution:** Construct a water line to loop the system. Looping the distribution system in this area increases capacity and reliability by allowing flow from either direction, and improves water quality by eliminating dead ends in the system where water can become stale and accumulate sediments.

**Identified By:** Staff

**In previous CIP?** No

**Related Project(s):** None

- 12. Project Name:** Reservoir Nos. 1, 3 and 4 Seismic Improvements
- Project Number:** WA-046
- Timeframe:** Long Term
- Estimated Cost:** \$ 402,000
- Funding Source:** Water Fund (100%)
- Problem:** Reservoirs 1, 3 and 4 were built prior to the implementation of current seismic standards and appear to be deficient with respect to modern seismic protections. Reservoirs are critical infrastructure to protect life and health during a disaster event. Additionally, reservoir failure in an earthquake could result in significant property damage. Reservoirs 1, 3 and 4 should be constructed and equipped to survive the Maximum Credible Earthquake (MCE) event to the maximum extent practicable based on current knowledge and standards.
- Proposed Solution:** Retrofit seismic upgrades to the reservoirs in accordance with the recommendation of a reservoir seismic study.
- Identified By:** *City of Troutdale Water Master Plan, 2012*
- In previous CIP?** Yes
- Related Project(s):** WA-044

13. **Project Name:** Update the Water Master Plan  
**Project Number:** WA-038  
**Timeframe:** Long Term  
**Estimated Cost:** \$ 100,000  
**Funding Source:** Water Improvement Fund (50%), Water Fund (50%)  
**Problem:** The current Water Master Plan was prepared in 2012 and will need updated.  
**Proposed Solution:** Update the Waster Master Plan.  
**Identified By:** Staff  
**In previous CIP?** No  
**Related Project(s):** None

**Cost Basis: 2016 Dollars							

# Sanitary Sewer Improvements

- 1. Project Name:** GO Bond Debt Service
- Project Number:** NA
- Timeframe:** Through FY 2017-18
- Estimated Cost:** \$ 11,389,291 (Remaining Balance: \$ 3,555,000)
- Funding Source:** Sanitary Sewer Improvement Fund (39%), Sewer Fund (28%) and Property Tax (33%).
- Problem:** Although the new treatment facility constructed with these GO bonds provided for a 47% increase in capacity (from 1.6 mgd to 3.0 mgd), the City Council determined that only 39% of the debt service payments should be paid by the Sanitary Sewer Improvement Fund.
- Proposed Solution:** Pay 39% of the debt service payment from the Sanitary Sewer Improvement Fund, plus an additional \$1,128,400 originally intended to be paid from SDCs but actually paid from property taxes due to lack of SDC revenue.
- Identified By:** Staff
- In Previous CIP?** Yes
- Related Project(s):** None

- 2. Project Name:** Wastewater Operations Annex (“GSA Property”) Improvements
- Project Number:** SA-063
- Timeframe:** Immediate
- Estimated Cost:** \$ 35,000
- Funding Source:** Sewer Fund (100%)
- Problem:** The City acquired this property adjacent to the WPCF through a grant from the Federal Government, for use in support of wastewater operations. The property lacks improvements to render it useable in its intended role. The Federal Government requires that the City improve and utilize the property or risk rescission of the grant.
- Proposed Solution:** Construct basic improvements on the property, including access and circulation roads and drainage facilities.
- Identified By:** Staff
- In Previous CIP?** No
- Related Project(s):** None

3. **Project Name:** Onsite Water Recycling System at the WPCF
- Project Number:** SA-064
- Timeframe:** Short Term
- Estimated Cost:** \$150,000
- Funding Source:** Sewer Fund (100%)
- Problem:** The WPCF operations and irrigation is one of the largest consumers among the City's water customers, driving up the total water demand on the City's system and consuming water resources. This is also a significant expense for the City.
- Proposed Solution:** Install a water recycling system at the WPCF to recycle treated effluent for use onsite as process water and for irrigating the WPCF grounds.
- Identified By:** Staff
- In Previous CIP?** No
- Related Project(s):** None

4. **Project Name:** Upgrade Pump Station #2 (Husky Pump Station)
- Project Number:** SA-040
- Timeframe:** Short Term
- Estimated Cost:** \$ 408,000
- Funding Source:** Sewer Fund (100%)
- Problem:** The pump station needs increased pump and motor capacity, increased wet well capacity, and enhanced motor controls.
- Proposed Solution:** Upgrade the capacity of the pump station by providing pump/motor, controls, and wet well improvements.
- Identified By:** *City of Troutdale Sanitary Sewer Master Plan, 2013*
- In Previous CIP?** Yes
- Related Project(s):** SA-062

<b>5. Project Name:</b>	Pump Station Emergency Backup Power
<b>Project Number:</b>	SA- 062
<b>Timeframe:</b>	Short, Medium Term
<b>Estimated Cost:</b>	\$ 200,000
<b>Funding Source:</b>	Sewer Fund (100%)
<b>Problem:</b>	Several of the City's sanitary sewer pump stations lack onsite emergency power supply and rely on a very limited number of portable generators that must be deployed from the WPCF. In the event of a power outage, especially an outage affecting multiple pump stations, sanitary sewer overflows could occur.
<b>Proposed Solution:</b>	Install onsite emergency backup power generators with automatic transfer switches at pump station #'s 2, 3, 4, 6, 7 and 8.
<b>Identified By:</b>	Staff
<b>In Previous CIP?</b>	No
<b>Related Project(s):</b>	SA-040, SA-059

- 6. Project Name:** Airport to Graham Road Sewer Main Upsizing
- Project Number:** SA-057
- Timeframe:** Medium Term
- Estimated Cost:** \$ 714,000
- Funding Source:** Developer
- Problem:** The existing segment of sewer main from the Sundial Road to the western end of Perimeter Way (via Graham Road) may be undersized with future flows, depending on intensity of industrial development
- Proposed Solution:** Upsize approximately 1,700 linear feet of the sewer main from 8" to 10"
- Identified By:** *City of Troutdale Sanitary Sewer Master Plan, 2013*
- In Previous CIP?** No
- Related Project(s):** None

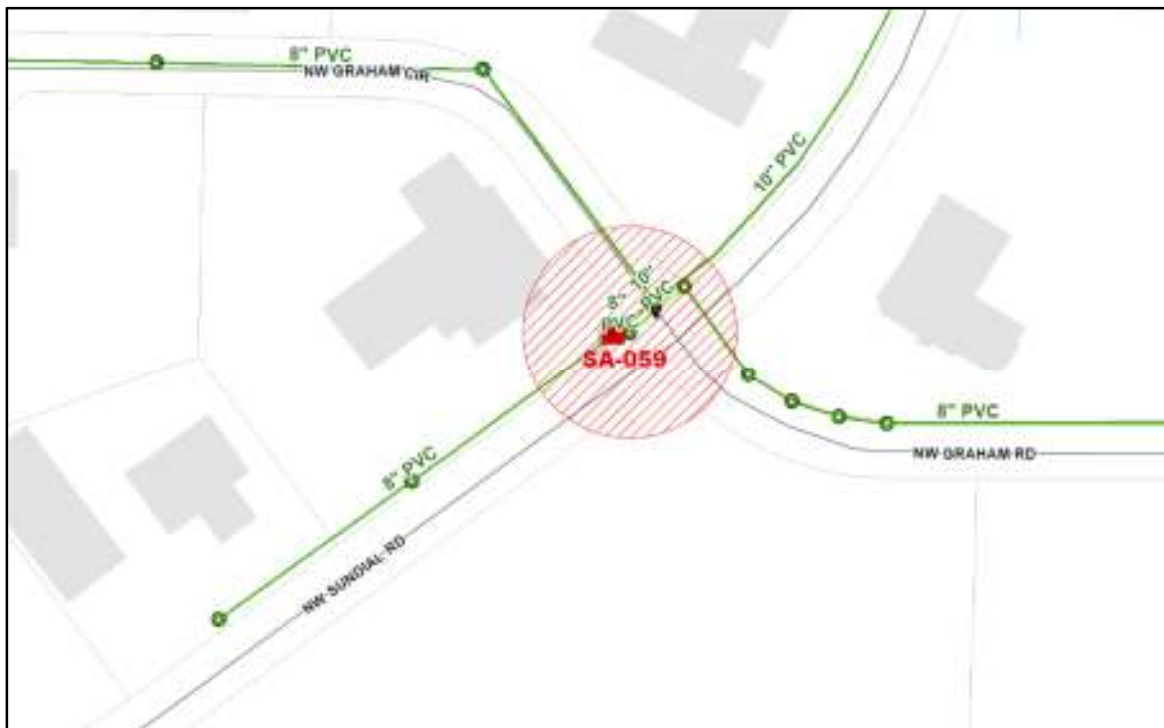

- 7. Project Name:** South Buxton Road Sewer Main Upsizing
- Project Number:** SA-055
- Timeframe:** Medium Term
- Estimated Cost:** \$ 554,000
- Funding Source:** Sanitary Sewer Improvement Fund (38.4%), Sewer Fund (61.6%)
- Problem:** Existing sewer mains in the southern segment of S Buxton Road are projected to be under capacity with future growth
- Proposed Solution:** Upsize approximately 1200 linear feet of the sewer mains in S Buxton Road from 8" to 10"
- Identified By:** *City of Troutdale Sanitary Sewer Master Plan, 2013*
- In Previous CIP?** Yes
- Related Project(s):**

9. **Project Name:** Upsize Pump Station #7 (Sundial Pump Station)
- Project Number:** SA-059
- Timeframe:** Medium Term
- Estimated Cost:** \$ 160,000
- Funding Source:** Developer (100%)
- Problem:** Future flows to PS #7 may exceed existing pumping capacity, depending on intensity of industrial development.
- Proposed Solution:** Install larger pumps.
- Identified By:** *City of Troutdale Sanitary Sewer Master Plan, 2013*
- In Previous CIP?** No
- Related Project(s):** SA-062

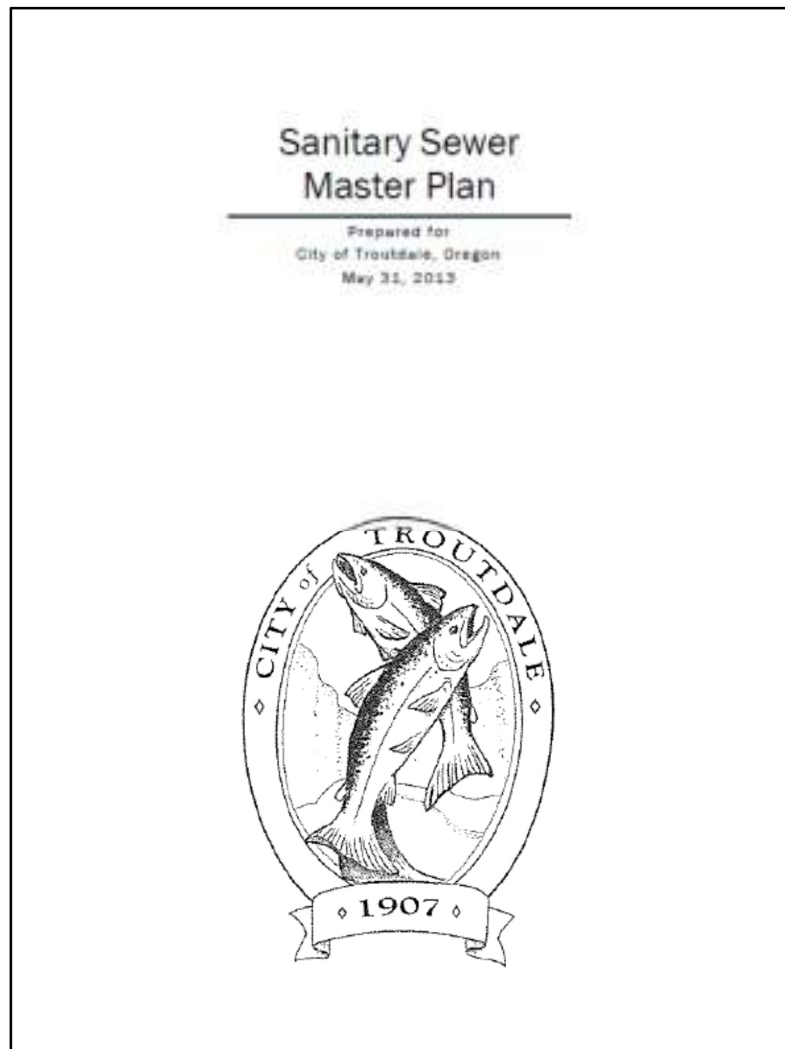

10. **Project Name:** Lower Beaver Creek and Troutdale Rd Sewer Main Upsizing
- Project Number:** SA-056
- Timeframe:** Long Term
- Estimated Cost:** \$ 3,776,000
- Funding Source:** Sewer Improvement Fund (38.4%), Sewer Fund (61.6%)
- Problem:** Existing sewer main in the southern segment of SE Beaver Creek Lane are projected to be under capacity with future growth.
- Proposed Solution:** Upsize the sewer main.
- Identified By:** *City of Troutdale Sanitary Sewer Master Plan, 2013*
- In Previous CIP?** No
- Related Project(s):** SA-055

11. **Project Name:** WPCF Upgrades
- Project Number:** SA- 061
- Timeframe:** Long Term
- Estimated Cost:** \$ 750,000
- Funding Source:** Sewer Fund (100%)
- Problem:** Changes in Federal and State NPDES regulations may result in more stringent limitations on Water Pollution Control Facility discharges that the City's WPCF cannot meet with its current treatment systems.
- Proposed Solution:** Construct additional and/or upgraded treatment systems at the WPCF.
- Identified By:** Staff
- In Previous CIP?** No
- Related Project(s):** None

12. **Project Name:** Update Sanitary Sewer Collection System Master Plan  
**Project Number:** SA-053  
**Timeframe:** Long Term  
**Estimated Cost:** \$ 100,000  
**Funding Source:** Sanitary Sewer Improvement Fund (50%), Sewer Fund (50%)  
**Problem:** The current Sanitary Sewer Master Plan was prepared in 2013 and will need updated.  
**Proposed Solution:** Update the Sanitary Sewer Master Plan.  
**Identified By:** Staff  
**In Previous CIP?** Yes  
**Related Project(s):** None

## CIP Summary Table

SANITARY SEWER							
Project Name	Project #	Timeframe*	Estimated Total Cost**	Estimated City Cost**	Funding Source(s)	In Previous CIP?	Related Projects
GO Bond Debt Service	NA	Thru FY2017-18	\$ 3,555,000	\$ 3,555,000	Sewer Imp (39%), Sewer (28%), General Property Tax (33%)	Y	None

# Storm Sewer Improvements

- 1. Project Name:** Graham Road Storm Drainage
- Project Number:** SD-N20
- Timeframe:** Immediate (in progress)
- Estimated Cost:** \$ 1,800,000 (Total Cost) \$ 550,000 (City Share)
- Funding Source:** Port of Portland (\$ 1,250,000)  
Storm Sewer Improvement Fund (\$ 550,000)
- Problem:** There is no developed storm drainage system along NW Graham Road.
- Proposed Solution:** Construct a storm drainage system on NW Graham Road.
- Identified By:** Staff
- In previous CIP?** Yes
- Related Project(s):** ST-080

- 2. Project Name:** Salmon Creek Weir Improvements
- Project Number:** SD-N21
- Timeframe:** Immediate (in progress)
- Estimated Cost:** \$ 950,000 (Total Cost) \$410,000 (City Share)
- Funding Source:** SDIC, Port of Portland  
Storm Sewer Improvement Fund (\$ 410,000)
- Problem:** There are potential stormwater capacity problems along Salmon Creek.
- Proposed Solution:** Relocate and increase the crest length of the existing relief weir located along Salmon Creek and the width of the channel which receives water from the weir. The suggested weir length and the channel width are 50 feet.
- Identified By:** *North Troutdale Storm Drainage Master Plan, 2007*
- In previous CIP?** Yes
- Related Project(s):** None

- 3. Project Name:** Beaver Creek Culverts
- Project Number:** SD-S27
- Timeframe:** Immediate (in-progress)
- Estimated Cost:** \$ 1,608,000 (Total Cost) \$ 100,000 (City share)
- Funding Source:** County/STIP (\$ 1,508,000)  
Storm Sewer Improvement Fund (\$ 100,000)
- Problem:** The Stark Street culvert must be upsized for capacity, upgraded for fish passage and lengthened to accommodate improvements to SE Stark Street. The Troutdale Road culvert requires upgraded fish passage.
- Proposed Solution:** Replace the existing Stark Street culvert with a larger, longer culvert or bridge, with fish passage. Retrofit the Troutdale Road culvert with an upgraded fish passage structure.
- Identified By:** STIP, Multnomah County
- In previous CIP?** Yes
- Related Project(s):** ST-007

4. **Project Name:** Rehabilitate and Upgrade North Evans Outfall
- Project Number:** SD-S28
- Timeframe:** Immediate
- Estimated Cost:** \$ 145,000
- Funding Source:** Storm Sewer Utility Fund (100%)
- Problem:** The North Evans outfall bubbler structure is severely undermined and unstable, and its rip-rap toe protection has unraveled and is sloughing away. The outfall structure's foundation is in imminent danger of failure, resulting in loss of the outfall structure and damage to Beaver Creek.
- Proposed Solution:** Rehabilitate and upgrade the outfall by constructing an upgraded foundation for the bubbler, resetting the bubbler, replacing the rip-rap toe protection and adding tie-backs to the slope with soil nails and cabling.
- Identified By:** Staff
- In previous CIP?** Yes
- Related Project(s):** None

**5. Project Name:** Update the North Troutdale Storm Drainage Master Plan

**Project Number:** SD-N29

**Timeframe:** Immediate

**Estimated Cost:** \$ 100,000 (Total Cost) City Share (\$50,000)

**Funding Source:** Storm Sewer Improvement Fund (25%)  
Storm Sewer Utility Fund (25%)  
SDIC (50%)

**Problem:** The current North Troutdale Storm Drainage Master Plan was prepared in 2006 and 2007. Shortly after that, the Port began designing and developing the Troutdale Reynolds Industrial Park, encompassing a large portion of the study area. Concurrently, Multnomah County Drainage District conducted a complete revised modeling of their service area. More recently, the owner of the Edgefield North property has conducted detailed site specific stormwater modeling and design work for that property, which may affect the need for downstream improvements. Considering all of this, it is prudent to update the North Troutdale Master Plan to incorporate the known changes within the study area and the additional information now available. This update may reveal that some currently planned projects are no longer needed, or that other, previously unidentified, projects should be added.

**Proposed Solution:** Update North Troutdale Storm Drainage Master Plan

**Identified By:** Staff

**In previous CIP?** No

**Related Project(s):** All SD-N

- 6. Project Name:** SW 14<sup>th</sup> Street Drainage Improvement
- Project Number:** SD-S35
- Timeframe:** Immediate
- Estimated Cost:** \$ 15,000
- Funding Source:** Storm Sewer Utility Fund (100%)
- Problem:** Recurring flooding on SW 14<sup>th</sup> Street due to insufficient disposal capacity.
- Proposed Solution:** Add capacity to existing drywell system or install an overflow connection to storm main in Hensley.
- Identified By:** Staff
- In previous CIP?** No
- Related Project(s):** None

7. **Project Name:** Columbia River Highway Bypass
- Project Number:** SD-N25
- Timeframe:** Short Term
- Estimated Cost:** \$ 466,000
- Funding Source:** Storm Sewer Improvement Fund (100%)
- Problem:** The existing 24-inch drain line located in the Columbia River Highway's railroad underpass does not provide sufficient conveyance capacity for future flows.
- Proposed Solution:** Install a bypass where future flows leave the drainage area north of Halsey and cross Columbia River Highway. The bypass will consist of 5 elements: 50 feet of 24-inch trenched culvert under Columbia River Highway, 160 feet of 24-inch drain line, 40 feet of 24-inch culvert under a railroad embankment, another 40 feet of 36-inch drain line, and 80 feet of 36-inch culvert under a second railroad embankment.
- Identified By:** *North Troutdale Storm Drainage Master Plan, 2007*
- In previous CIP?** Yes
- Related Project(s):** SD-N29

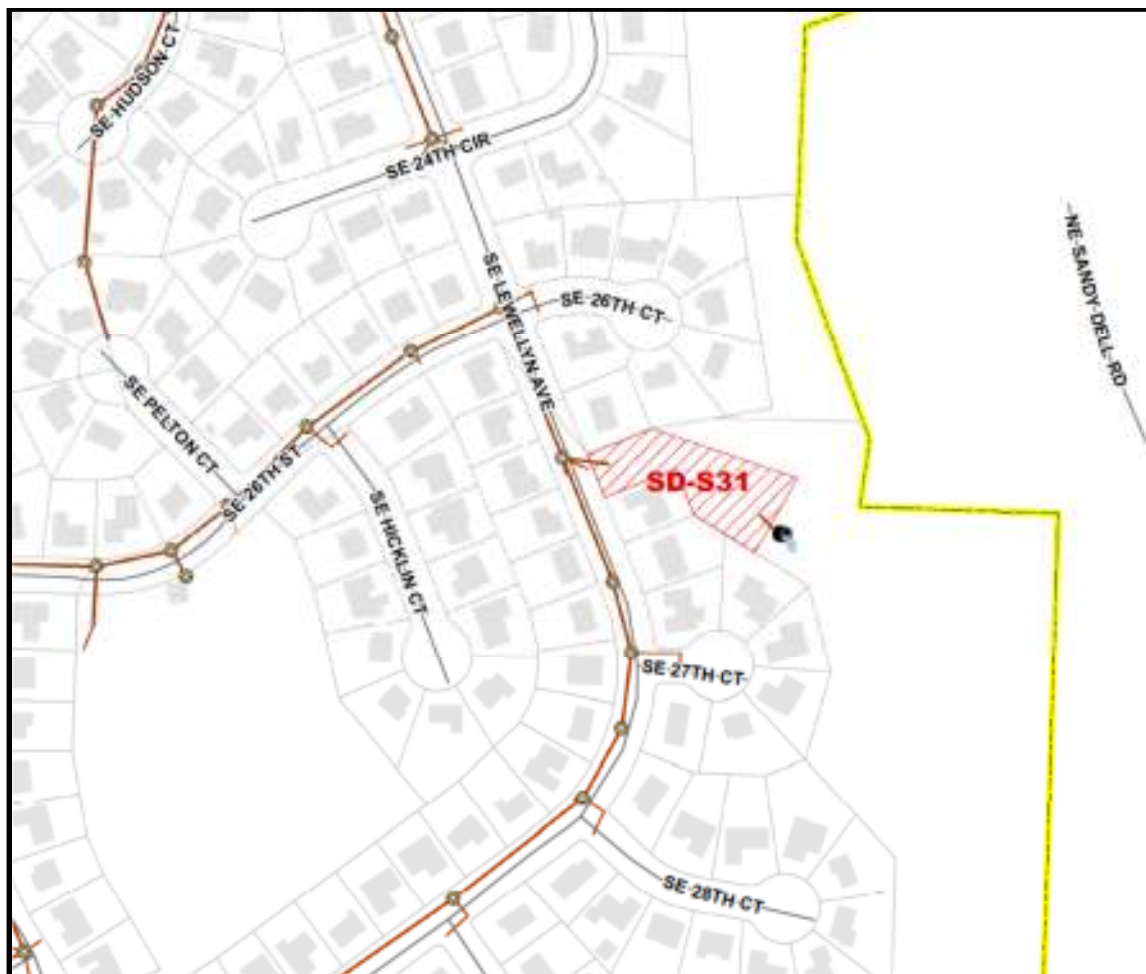

- 8. Project Name:** North Arata Creek Drain Line Improvement
- Project Number:** SD-N23
- Timeframe:** Short Term
- Estimated Cost:** \$ 760,000
- Funding Source:** Storm Sewer Improvement Fund (100%)
- Problem:** There are potential stormwater capacity problems along Arata Creek south of Marine Drive with increasing flows from urbanization.
- Proposed Solution:** Install 160 feet of 48-inch culvert under the railroad immediately upstream of the outlet to Salmon Creek and 520 feet of 48-inch drain line directly west of the airport runway and parallel to the existing drain lines.
- Identified By:** *North Troutdale Storm Drainage Master Plan, 2007*
- In previous CIP?** Yes
- Related Project(s):** SD-N29

- 9. Project Name:** South Arata Creek Culvert Improvement
- Project Number:** SD-N24
- Timeframe:** Short Term
- Estimated Cost:** \$ 678,000
- Funding Source:** Storm Sewer Improvement Fund (100%)
- Problem:** The existing railroad culvert needs to be augmented with an additional culvert to prevent localized flooding in the area immediately upstream of the railroad embankment.
- Proposed Solution:** Install an additional 470 feet of 36-inch culvert where Arata Creek crosses the railroad embankment north of Interstate 84 and additional piping under the paved area directly north of the embankment.
- Identified By:** *North Troutdale Storm Drainage Master Plan, 2007*
- In previous CIP?** Yes
- Related Project(s):** SD-N29

<b>10. Project Name:</b>	Sandee Palisades Detention Pond Retrofit
<b>Project Number:</b>	SD-S31
<b>Timeframe:</b>	Short Term
<b>Estimated Cost:</b>	\$ 170,000
<b>Funding Source:</b>	Storm Sewer Utility Fund (100%)
<b>Problem:</b>	There is no stormwater quality treatment for existing development in this area of the City. The City's NPDES MS4 permit requires that the City take incremental steps to provide treatment to existing developed areas in the City.
<b>Proposed Solution:</b>	Retrofit the existing detention pond to add stormwater quality treatment capability
<b>Identified By:</b>	<i>South Troutdale Storm Drainage Master Plan, 2012</i>
<b>In previous CIP?</b>	Yes
<b>Related Project(s):</b>	None

**11. Project Name:** Marine Drive Culvert Bypass

**Project Number:** SD-N26

**Timeframe:** Medium Term

**Estimated Cost:** \$ 635,000

**Funding Source:** Storm Sewer Improvement Fund (100%)

**Problem:** There is a potential for flooding northeast of the Marine Drive curve.

**Proposed Solution:** Provide a cross connection between the two south-to-north drainage systems to help balance flows by providing 2100 feet of 36-inch drain line north of and parallel to Marine Drive and an additional 150 feet of 36-inch culvert crossing Marine Drive east of the I-84 Corporate Center.

**Identified By:** *North Troutdale Storm Drainage Master Plan, 2007*

**In previous CIP?** Yes

**Related Project(s):** SD-N29

**12. Project Name:** NW Dunbar Avenue Storm Line

**Project Number:** SD-N16

**Timeframe:** Medium Term

**Estimated Cost:** \$ 361,000

**Funding Source:** Storm Sewer Improvement Fund (100%)

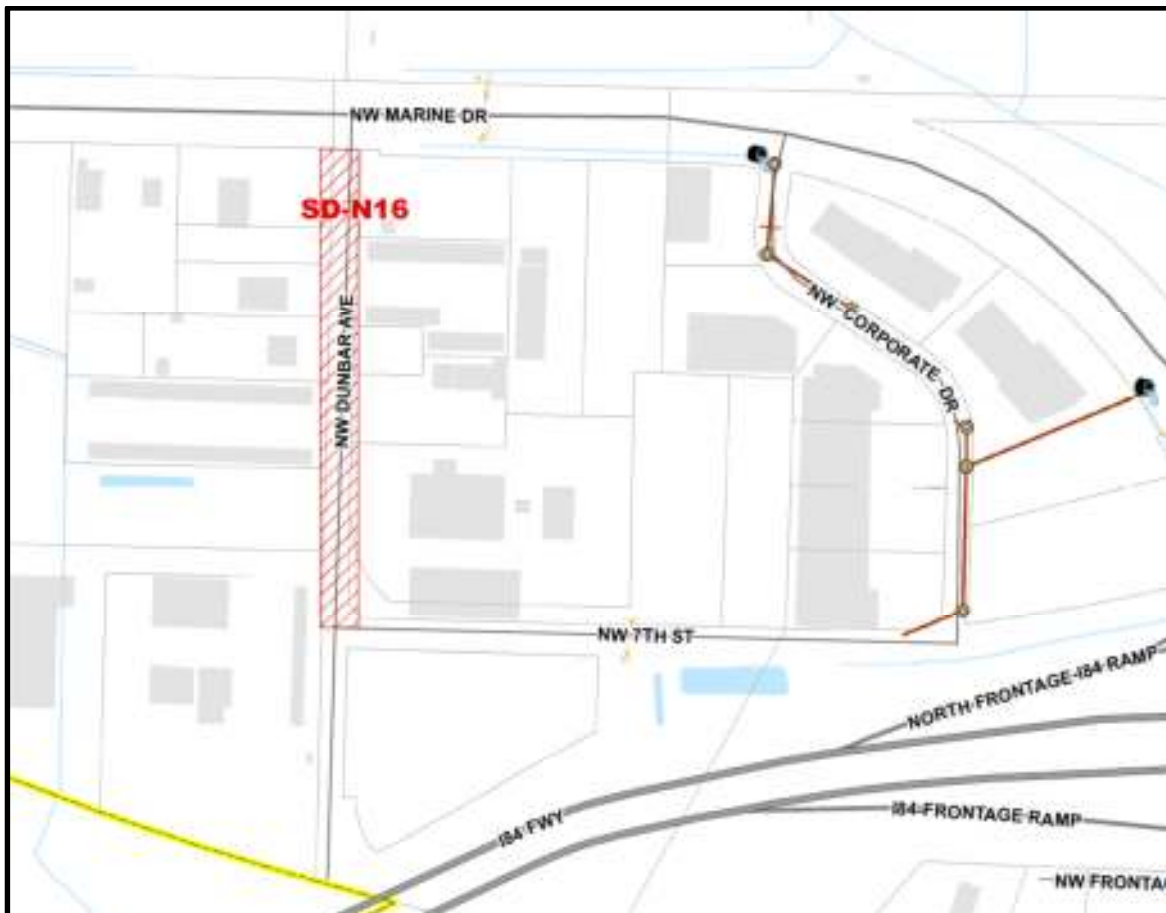

**Problem:** When NW Dunbar Avenue is improved, a new stormwater collection and conveyance system will be required. Properties along Dunbar currently have limited options for storm drainage and some of these commercial/industrial properties experience localized onsite flooding during heavy rain events.

**Proposed Solution:** Construct a new stormwater collection and conveyance system for NW Dunbar Avenue.

**Identified By:** Staff

**In previous CIP?** Yes

<b>13. Project Name:</b>	SE 3rd Street and SE Dora Main Upsizing
<b>Project Number:</b>	SD-S29
<b>Timeframe:</b>	Medium Term
<b>Estimated Cost:</b>	\$ 149,000
<b>Funding Source:</b>	Storm Sewer Utility Fund (100%)
<b>Problem:</b>	Potential flooding along 3 <sup>rd</sup> and Dora Streets during high flow events due to insufficient capacity in the mains.
<b>Proposed Solution:</b>	Upsize approximately 453 linear feet of the storm sewer mains in Dora Avenue from 12" to 15".
<b>Identified By:</b>	<i>South Troutdale Storm Drainage Master Plan, 2012</i>
<b>In previous CIP?</b>	Yes
<b>Related Project(s):</b>	None

**14. Project Name:** SE 21st Street Main Upsizing

**Project Number:** SD-S30

**Timeframe:** Medium Term

**Estimated Cost:** \$ 122,000

**Funding Source:** Storm Sewer Utility Fund (100%)

**Problem:** Potential flooding along SE 21<sup>st</sup> Street during high flow events due to insufficient capacity in the main.

**Proposed Solution:** Upsize approximately 364 linear feet of the storm sewer mains in SW 21<sup>st</sup> Street from 12" to 15".

**Identified By:** *South Troutdale Storm Drainage Master Plan, 2012*

**In previous CIP?** Yes

**Related Project(s):** None

**15. Project Name:** Strawberry Meadows Detention Pond Retrofit

**Project Number:** SD-S32

**Timeframe:** Medium Term

**Estimated Cost:** \$ 98,000

**Funding Source:** Storm Sewer Utility Fund (100%)

**Problem:** There is no stormwater quality treatment for existing development in this area of the City. The City's NPDES MS4 permit requires that the City take incremental steps to provide treatment to existing developed areas in the City.

**Proposed Solution:** Retrofit the existing detention pond to add stormwater quality treatment capability.

**Identified By:** *South Troutdale Storm Drainage Master Plan, 2012*

**In previous CIP?** Yes

**Related Project(s):** None

**16. Project Name:** Hensley Road Storm Drainage – N/S Leg

**Project Number:** SD-S34

**Timeframe:** Medium Term

**Estimated Cost:** \$ 50,000

**Funding Source:** Storm Sewer Improvement Fund (50%), Storm Sewer Utility Fund (50%)

**Problem:** Street widening and improvements to the N/S leg of SW Hensley Road will necessitate the provision of storm drainage systems to serve the improved roadway.

**Proposed Solution:** Install storm drainage facilities associated with roadway improvements on the N/S leg of SW Hensley Road.

**Identified By:** Staff

**In previous CIP?** No\*

**Related Project(s):** ST-012

\* The Hensley Road street improvements have long been in the Transportation CIP, but there has not been a corresponding storm drainage project in the CIP previously

**17. Project Name:** Stuart Ridge Detention Pond Retrofit

**Project Number:** SD-S33

**Timeframe:** Long Term

**Estimated Cost:** \$ 73,000

**Funding Source:** Storm Sewer Utility Fund (100%)

**Problem:** There is no stormwater quality treatment for existing development in this area of the City. The City's NPDES MS4 permit requires that the City take incremental steps to provide treatment to existing developed areas in the City.

**Proposed Solution:** Retrofit the existing detention pond to add stormwater quality treatment capability.

**Identified By:** *South Troutdale Storm Drainage Master Plan, 2012*

**In previous CIP?** Yes

**Related Project(s):** None

**18. Project Name:** SDIC Pump Station Upgrade, Phase II

**Project Number:** SD-N07B

**Timeframe:** Long Term

**Estimated Cost:** \$ 602,000 (City Share)

**Funding Source:** Storm Sewer Improvement Fund (50%), Storm Sewer Utility Fund (50%)

**Problem:** There will be inadequate pumping capacity at the Sandy Drainage Improvement Company's pump station with future flows from urbanization.

**Proposed Solution:** Construct additional pumping and/or storage capacity.

**Identified By:** *North Troutdale Storm Drainage Master Plan, March 1990*

**In previous CIP?** Yes

**Related Project(s):** SD-N29

<b>19. Project Name:</b>	Unified Storm Drainage Master Plan
<b>Project Number:</b>	SD-SN1
<b>Timeframe:</b>	Long Term
<b>Estimated Cost:</b>	\$ 150,000 (Total Cost) \$ 112,500 (City Share)
<b>Funding Source:</b>	Storm Sewer Improvement Fund (37.5%) Storm Sewer Utility Fund (37.5%) SDIC (25%)
<b>Problem:</b>	The North Troutdale Storm Drainage Master Plan, prepared in 2007, and South Troutdale Storm Drainage Master Plan, prepared in 2012, will be outdated and in need of update. These master plans should be unified in the future.
<b>Proposed Solution:</b>	Update both the North and South Troutdale Storm Drainage Master Plans in a new unified City of Troutdale Storm Drainage Master Plan.

## Parks Improvements

- 1. Project Name:** Update Parks Master Plan

**Project Number:** PA-001

**Timeframe:** Immediate

**Estimated Cost:** \$ 50,000

**Funding Source:** Parks Improvement Fund (50%), General Fund-Parks (50%)

**Problem:** The Parks Master Plan, prepared in 2006, and the Glenn Otto Park Master Plan, prepared in 2002, are near the end of their planning horizon. Changes in population forecasts, demographics, community needs and land availability render the existing Park Master Plan and Glenn Otto Park Master Plan antiquated and in need of update.

**Proposed Solution:** Prepare a new Parks Master Plan, including a new Glenn Otto Park master Plan.

**Identified By:** Staff

**In previous CIP?** No

**Related Project(s):** All PA CIP
- 2. Project Name:** Visionary Park

**Project Number:** PA-018

**Timeframe:** Immediate

**Estimated Cost:** \$ 60,000

**Funding Source:** Parks Improvement Fund (100%)

**Problem:** Citizens and elected officials have identified the need to recognize the centennial anniversary of the Historic Columbia River Highway. Commemorative artwork has been offered as a donation to the City, and an appropriate site identified, but site work and related amenities are needed.

**Proposed Solution:** Construct the Visionary Park site work and related amenities as provided in Resolution #2306

**Identified By:** City Council (Resolution #2306), Visionary Friends of Troutdale

**In previous CIP?** No

**Related Project(s):** None

- 3. Project Name:** Improve Existing Parks PH I
- Project Number:** PA-002
- Timeframe:** Short Term
- Estimated Cost:** \$ 2,149,000
- Funding Source:** Parks Improvement Fund (65.9%), General Fund-Parks (34.1%)
- Problem:** Increases in population and intensification of use at various parks, together with existing deficiencies at various parks, necessitates improvements, upgrades and additional amenities.
- Proposed Solution:** Make improvements at various parks to meet growth needs and provide desired upgrades as described in tables 6.11-6.13 of the *Parks Master Plan, 2006*.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-007, PA-011
- 
- 4. Project Name:** Special Use Park Development
- Project Number:** PA-003
- Timeframe:** Short Term
- Estimated Cost:** \$ 4,000,000
- Funding Source:** Urban Renewal Agency (95%), Parks Improvement Fund (5%)
- Problem:** The Urban Renewal Area will require public parks space including special use space that will complement the URA and the riverfront.
- Proposed Solution:** Develop approximately 2.0 acres of the former STP site as a special use park.
- Identified By:** *Parks Master Plan, 2006; Riverfront Renewal Plan, 2006 (AMDD 2014)*
- In previous CIP?** Yes
- Related Project(s):** PA-001

- 5. Project Name:** Neighborhood Park Site Acquisition PH I  
**Project Number:** PA-004  
**Timeframe:** Short Term  
**Estimated Cost:** \$ 1,075,000  
**Funding Source:** Parks Improvement Fund (100%)  
**Problem:** Increases in population necessitate the acquisition of additional neighborhood park land to meet the City's established Level of Service standard.  
**Proposed Solution:** Acquire approximately 4.0 acres of neighborhood park land in growing areas of the City.  
**Identified By:** *Parks Master Plan, 2006*  
**In previous CIP?** Yes  
**Related Project(s):** PA-001, PA-006, PA-008
- 6. Project Name:** Skateboard Park  
**Project Number:** PA-018  
**Timeframe:** Short/Medium Term  
**Estimated Cost:** \$ 455,000  
**Funding Source:** Parks Improvement Fund (6%) General Fund-Parks (94%)  
**Problem:** The Parks Advisory Committee has identified a community demand and desire to provide a public skateboard park facility in the City  
**Proposed Solution:** Construct a skateboard park on existing or acquired City park land  
**Identified By:** Parks Advisory Committee  
**In previous CIP?** No  
**Related Project(s):** None

- 7. Project Name:** Community Park Site Acquisition  
**Project Number:** PA-005  
**Timeframe:** Short/Medium Term  
**Estimated Cost:** \$ 1,881,000  
**Funding Source:** Parks Improvement Fund (100%)  
**Problem:** Increases in population necessitate the acquisition of additional community park land to meet the City's established Level of Service standard.  
**Proposed Solution:** Acquire approximately 7.0 acres of community park land to meet growth needs.  
**Identified By:** *Parks Master Plan, 2006*  
**In previous CIP?** Yes  
**Related Project(s):** PA-001, PA-009
- 8. Project Name:** Neighborhood Park Development  
**Project Number:** PA-006  
**Timeframe:** Short/Medium Term  
**Estimated Cost:** \$ 400,000  
**Funding Source:** Parks Improvement Fund (100%)  
**Problem:** Neighborhood park land acquired in Project PA-004 will need to be developed with park improvements and amenities.  
**Proposed Solution:** Develop approximately 4.0 acres of neighborhood park land to meet growth needs.  
**Identified By:** *Parks Master Plan, 2006*  
**In previous CIP?** Yes  
**Related Project(s):** PA-001, PA-004

- 9. Project Name:** Improve Existing Parks PH II
- Project Number:** PA-007
- Timeframe:** Short/Medium Term
- Estimated Cost:** \$ 1,074,000
- Funding Source:** Parks Improvement Fund (65.9%), General Fund-Parks (34.1%)
- Problem:** Increases in population and intensification of use at various parks, together with existing deficiencies at various parks, necessitates improvements, upgrades and additional amenities.
- Proposed Solution:** Make improvements to existing parks to meet growth needs and provide desired upgrades as described in tables 6.11-6.13 of the *Parks Master Plan, 2006*.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-002, PA-011
- 
- 10. Project Name:** Community Park Site Development
- Project Number:** PA-009
- Timeframe:** Short/Medium Term
- Estimated Cost:** \$ 400,000
- Funding Source:** Parks Improvement Fund (100%)
- Problem:** Community park land acquired in project PA-005 will need to be developed with park improvements and amenities.
- Proposed Solution:** Develop approximately 7 acres of community parks in growing areas of the City.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-005

- 11. Project Name:** Pathway Trails Development PH I
- Project Number:** PA-010
- Timeframe:** Short/Medium Term
- Estimated Cost:** \$ 388,000
- Funding Source:** Parks Improvement Fund (100%)
- Problem:** Additional pathway and trail development is need to complete the “40-mile loop”.
- Proposed Solution:** Develop approximately 1 linear mile of pathway/trails to complete the “40-mile loop” trail on the levee and along Harlow Place.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-015
- 
- 12. Project Name:** Improve Existing Parks PH III
- Project Number:** PA-011
- Timeframe:** Short/Medium Term
- Estimated Cost:** \$ 1,074,000
- Funding Source:** Parks Improvement Fund (65.9%), General-Parks (34.1%)
- Problem:** Increases in population and intensification of use at various parks, together with existing deficiencies at various parks, necessitates improvements, upgrades and additional amenities.
- Proposed Solution:** Make improvements to existing parks to meet growth needs and provide desired upgrades as described in tables 6.11-6.13 of the *Parks Master Plan, 2006*.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-002, PA-007

- 13. Project Name:** Pathways/Trails Development PH II
- Project Number:** PA-015
- Timeframe:** Long Term
- Estimated Cost:** \$1,090,000
- Funding Source:** General Fund-Parks (100%)
- Problem:** Additional pathway and trail development is needed to meet the City's desired level of service.
- Proposed Solution:** Develop approximately 5.9 linear miles of pathway/trails.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001, PA-010
- 
- 14. Project Name:** Neighborhood Park Acquisition and Development PH III
- Project Number:** PA-016
- Timeframe:** Long Term
- Estimated Cost:** \$ 1,851,000
- Funding Source:** General Fund-Parks (100%)
- Problem:** Existing deficiencies in neighborhood park land necessitate the acquisition and development of additional neighborhood parks to meet the City's Level of Service standard.
- Proposed Solution:** Acquire and develop approximately 5.02 acres of land as neighborhood parks.
- Identified By:** *Parks Master Plan, 2006*
- In previous CIP?** Yes
- Related Project(s):** PA-001,

**15. Project Name:** Community Park Acquisition and Development PH III

**Project Number:** PA-017

**Timeframe:** Long Term

**Estimated Cost:** \$ 2,603,000

**Funding Source:** General Fund-Parks (100%)

**Problem:** Existing deficiencies in community park land necessitate the acquisition and development of additional community park land to meet the City's Level of Service standard.

**Proposed Solution:** Acquire and develop approximately 7.06 acres of land as a community park.

**Identified By:** *Parks Master Plan, 2006*

**In previous CIP?** Yes

**Related Project(s):** PA-001

## CIP Summary Table

Parks
